

CHASSAGNE-MONTRACHET LES PIERRES 2017

These vines are covered with stones.

VINTAGE

After a cold and dry start to the year, temperatures rose quickly at the end of March, triggering a rapid resumption of the growing cycle. A few morning frosts impacted part of the vineyard at the end of April but without major damage. The flowering period takes place in a few days at the beginning of June in superb weather. The summer is hot and sunny but delivers some welcome storm rain to help the plant enter the veraison stage. The harvest takes place at the beginning of September with ideal weather and impeccable health quality of the grapes.

VINEYARD

This vineyard is located on a rocky bed which has been used in the past to build the near wash house. From two owned plots and a neighboring plot.

Wine-Growing method : organic (non-certified)

Harvest: 100 % manual

Soil : Calcareous Clay

Production area : 8,41 ha
