PULIGNY-MONTRACHET - FRANCE

MEURSAULT 2019

These excellent lands for vines were developed by the monks of Cîteaux from 1098.

VINTAGE

The season begins with a mild and dry winter, leading to an early start to the growing cycle. A significant episode of frost occurred on the Chardonnay on April 5 then on the Pinot Noir on April 14, causing a harvest loss (30% to 50%). A cooling at the beginning of June leads to capricious flowering. This causes runoff and further reduces yields while concentrating the aromas. The hot summer induces water stress in certain places which delays the maturity of the grapes. Because the berries are small and few number, the sugar level in the grapes is naturally high but the lack of water helped maintain good acidity.

VINEYARD

It is the biggest village of la Côte de Beaune which produces mainly white wines. According to the location of plots, the soil is rich and deep (at the bottom of the hillside) or limestone and marly in the "mountain". Our cuvee comes from a blending of 15 to 20 different but complementary plots in order to obtain rich and elegant wines.
