SAINT-AUBIN 1ER CRU DENTS DE CHIEN 2019

This name comes from the vineyard located below a sharp rock which looks like the canine of a dog.

VINTAGE

The season begins with a mild and dry winter, leading to an early start to the growing cycle. A significant episode of frost occurred on the Chardonnay on April 5 then on the Pinot Noir on April 14, causing a harvest loss (30% to 50%). A cooling at the beginning of June leads to capricious flowering. This causes runoff and further reduces yields while concentrating the aromas. The hot summer induces water stress in certain places which delays the maturity of the grapes. Because the berries are small and few number, the sugar level in the grapes is naturally high but the lack of water helped maintain good acidity.

VINEYARD

Blending of three plots in the top of the part of the territory, along Puligny-Montrachet. It is a limestone soil, draining, facing South.
