## SAINT-AUBIN 1ER CRU COMBES AU SUD 2023

This Climat borders the Premiers Crus of Chassagne-Montrachet

### VINTAGE

A demanding vintage. 2023 is now seen as the hottest year with the temperatures above seasonal averages. This vintage is also characterized by significant water deficit during the growing season and strong disease pressure. We also noticed strong heterogeneities in maturity with dynamics that are difficult to anticipate. The harvest was generous, allowing us to carry out a thorough sorting, especially on the Pinot Noir.

### VINEYARD

This Climat is located on a clay-limestone hillside with dark red alluvium. This very steep plot with slightly hollow hilly topography faces east.
